Warren RECC is an equal opportunity provider and employer.

MESSAGE FROM THE PRESIDENT

Education, training and information

This month, we continue our examination of the Seven Cooperative Principles, with principle No. 5: Education, Training and Information. As you know, electric cooperatives were founded in local communities by local citizens. Our mission includes sharing education and information for the betterment of our cooperative and our communities as a whole.

Here at Warren RECC, we consider it our duty to make sure our members are up to date on the latest technologies and how those technologies can improve their lives and budgets.

This month, we unveiled our new, all-electric Chevy Bolt. Electric vehicles (EVs) are nothing new, but advances in technology and stricter

fuel efficiency standards are making them increasingly common.

Over the years, several myths have developed about the reliability of electric cars. With the growth in the EV market, it is important for us as a cooperative to help educate our members on the advantages and disadvantages of owning an electric vehicle. We will be using our new car to illustrate the practicality of today's cars, and help our members make informed decisions on what's best for their family.

If you are interested in learning more about electric cars, visit our website at www.wrecc.com/electric-vehicle. Still looking for more information? Fill out the Contact Us form on our webpage or give us a call at (270) 842-6541.

The dash of the all-electric Chevy Bolt keeps the driver up to date on how much power is left after each charge. Photo: Warren RECC staff
