

Spark the Christmas Spirit

I would love to nominate two people for the Spark the Christmas Spirit giveaway. They are parents to beautiful twin girls. Both were born with dilated cardiomyopathy, a rare and serious heart condition. While one case is milder, the other has been much more severe. She has been in Norton Children's Hospital for almost 100 days in wait for her new heart and fighting with incredible strength every single day.

Through all the fear and uncertainty, the parents continue to be a light - sharing updates filled with hope, faith, and gratitude. Their story has united our small town where neighbors, friends, and even strangers have come together to pray, send gifts, and help lift this family up during this unimaginable journey.

Despite spending months in the hospital, the parents still find ways to celebrate milestones, from the twins' first birthday to the small moments that remind them of God's faithfulness. Their courage and unwavering love for their girls have inspired our whole community. I can't think of a more deserving family to receive a little extra Christmas magic this year.
