

Approved Single-Phase Meter Bases

The electric meter bases listed below are approved for use on Warren RECC's system.

Specifications for meter bases and meter bases/main combo:

1. All meter bases must be UL Approved with label.
2. All meter bases must be Ringless steel construction.
3. All meter bases must have a lever bypass.
4. All 200-amp meter bases must have lugs installed on line side.
5. Meter bases can be purchased from any electrical supplier.
6. Non-approved meter bases will not be energized by WRECC.
7. Minimum #350 kmcil lugs must be installed on the line side of all 400-amp meter bases.
8. Vertical meter main combo with load center must have a sealable side wire tray to protect the utility wire.
